

Configure the alert inbox in SAP Solution Manager

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Configure SAP solution manager to retrieve alerts in the system by enabling the alert inbox with the SOA manager.

Before you begin

Role required: evt_mgmt_admin

Procedure

1. Navigate to SOA MANAGER in your solution manager:
`/sap/bc/webdynpro/sap/appl_soap_management?sap-client=XXX&sap-language=EN#`
2. Select Simplified Web Service Configuration, then validate the form to activate the service.
You must use simplified mode else the resulting web services is different with other modes and not compatible with the connector.

3. Select Search.
4. Check the row with the creation type Simple consumer related.
If anything goes wrong, check [Configuring a Service Provider \(Simplified\)](#)

What to do next

View alerts generated in SAP Solution Manager to see any pressing issues, as described in
View alerts in the SAP Solution Manager inbox.
