- ⌚ 1 minute to read

Integrate Instana with Event Management by adding Instana as an authenticated data source.

What authentication is used

The methods of authentication are as follows:

- Basic webhook authentication: Provides a basic standard of authentication, using username and password. For more information, see [Integrate Instana events](#).
- OAuth authentication: Provides enterprise-grade authentication to keep your enterprise environment safe. Authentication is performed using access tokens. For more information, see [Integrate Instana with OAuth authentication](#).
- **Integrate Instana events**
Integrate Instana with Event Management by adding a standard webhook in the Instana console.
- **Integrate Instana with OAuth authentication**
Integrate Instana with Event Management with ServiceNow using OAuth authentication.
