

Create a push connector configuration parameter

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Some connectors have no parameters that are shipped out of the box. Therefore, it's necessary to create and add the parameter to the push connector configurations list in the form layout before adding the new parameter.

Before you begin

Role required: evt_mgmt_admin, personalize_form

Procedure

1. Navigate to All > Event Management > Integrations > Push Connectors.
2. Open a push connector.
3. On the Push Connector form, right-click on the form header and select Configure > Form Layout.
4. In the Available list, search for Push Connector Configurations > Push Connector, and move it to the Selected list.
5. Select Save.
6. In the Push Connector Configurations [sn_em_connector_push_config] table, double-click on Insert a new row to add a new push connector configuration parameter.
7. Select Update.

Result

Push Connector Configurations list added to push connector form layout. You can now create push connector parameters.
