

Service Operations Workspace for ITOM user interface

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 2 minutes to read

Explore the interface to understand how an operator can prioritize tasks and offer solutions.

Access Service Operations Workspace

Open the workspace by navigating to Workspaces > Service Operations Workspace.

Home page

To access information on the Home page, select the home icon ().

The home page provides operators with a comprehensive snapshot of the current operational landscape. The Overview section presents vital insights, including alerts assigned to the operator, team-based alerts, unassigned team alerts, monitored services, and open alerts. This Alerts Assigned to You section furnishes operators with specific details regarding alerts tailored to their responsibilities. Information includes the alert number, initial event generation time, description, priority group, severity, source, group, configuration item, state, node, metric name, and last updated timestamp. Both sections streamline operations by offering operators a concise overview and personalized insights into alerts relevant to their responsibilities, facilitating swift prioritization and proactive resolution of critical issues.

Figure 1. Home page

List page

To access information on alerts from List, select the List icon ().

The Lists tab displays predefined lists, while the My Lists tab allows users to create and customize their own lists for personalized task management. For detailed instructions on creating a list, see [Create a list in Service Operations Workspace for ITOM](#).

Figure 2. Lists page

The Lists page displays a table of all alerts. The table has columns for Number, Initial event generation time, Description, Priority group, Severity, Source, Group, Configuration item, and State. The table is filtered to show alerts assigned to the user, sorted by initial event generation time.

☐	Number	Initial event generation time	Description	Priority group	Severity	Source	Group	Configuration item	State
☐	Alert1468965	2024-07-01 19:19:50	CRUTYOWHTHREA02:CPU queue length TRIGGERED EVENT: CPU queue length is too high WITH VALUE:34	Low	Warning	Zabbix	None	crutyowhthea02	Open
☐	Alert1468964	2024-07-01 19:16:27	CRUPRGWSQ001A:CPU queue length TRIGGERED EVENT: CPU queue length is too high WITH VALUE:1		Warning	Zabbix	None	cruprgwsq001a	Closed
☐	Alert1468962	2024-07-01 18:56:08	Virtual machine has CPU contention due to multi-vCPU scheduling issues (co-stop) caused by too many vCPUs	Urgent	Major	vRealize	Secondary	cruprghthsm02	Open
☐	Alert1468963	2024-07-01 18:56:08	Group of alerts, Virtual machine has CPU contention due to multi-vCPU scheduling issues (co-stop) caused by too many vCPUs	Urgent	Major	Group Alert	CMD8	cruprghthsm02	Open
☐	Alert1468961	2024-07-01 18:56:05	Fully-automated DRS-enabled cluster has CPU contention caused by less than half of the virtual machines	Low	Minor	vRealize	None	(empty)	Closed
☐	Alert1468960	2024-07-01 18:51:09	Virtual machine has CPU contention due to multi-vCPU scheduling issues (co-stop) caused by too many vCPUs	High	Major	vRealize	None	(empty)	Open
☐	Alert1468959	2024-07-01 18:47:29	cruprghthsm02:Load average (15m avg) TRIGGERED EVENT: Load average is too high WITH VALUE:3.41	Urgent	Minor	Zabbix	Secondary	cruprghthsm02	Closed
☐	Alert1468958	2024-07-01 18:31:09	Virtual machine has CPU contention due to multi-vCPU scheduling issues (co-stop) caused by too many vCPUs	Low	Minor	vRealize	None	(empty)	Closed

Record view

Access detailed information for any alert by selecting its alert number to open the record.

Figure 3. Alert details page

Express List

Express List offers quick alert information for efficient monitoring, resolution, impact evaluation, tracking, and incident reporting.

To access information on express list, select the Express List icon (📋).

Alert automation

Automations streamline processes, enabling timely responses to potential issues by ignoring, enriching, grouping, and responding to alerts. They reduce manual intervention, lower the risk of errors, and free up IT teams to focus on strategic tasks, boosting system reliability and customer satisfaction.

To access information on automations, select the alert automations icon ().
