

Modify the first-level cards in the Service Operations Workspace for ITOM Overview section

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Customize the data displayed in the first-level cards in the Overview section by configuring various parameters such as the header label, data source, metric, group by field, and viewAllQuery. This allows for a more tailored and relevant display of information.

Before you begin

Role required: evt_mgmt_admin

Procedure

1. Navigate to sys_ux_client_script_include.list.
2. From the UX Client Script Includes list, select SowEMLandingPageUtilsSNC client script include definition.
3. On the UX Client Script Include form, edit the Script field.

For example:

```
}  
};  
const labelMap = {  
  'em_alert': {  
    'alerts_assigned_to_you': {  
      '1': 'Alerts assigned to you - Urgent',  
      '2': 'Alerts assigned to you - High',  
      '3': 'Alerts assigned to you - Moderate',  
      '4': 'Alerts assigned to you - Low'  
    },  
    'open_alerts': {  
      '1': 'Open alerts - Urgent',  
      '2': 'Open alerts - High',  
      '3': 'Open alerts - Moderate',  
      '4': 'Open alerts - Low'  
    },  
  },  
}
```

```
    'team_alerts_assigned': 'Assigned team alerts - to ',  
    'team_alerts_unassigned': {  
        '1': 'Unassigned team alerts - Urgent',  
        '2': 'Unassigned team alerts - High',  
        '3': 'Unassigned team alerts - Moderate',  
        '4': 'Unassigned team alerts - Low'  
    }  
}
```

4. Click Update.
