

Create a copy of the Service Operations Workspace for ITOM landing page

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Make visual styling changes to the sub-pages in the home page. This will enhance the overall user experience by providing a consistent and visually appealing interface, improving navigation, and ensuring that key information is easily accessible and engaging.

Before you begin

Role required: evt_mgmt_admin or ui_builder_admin

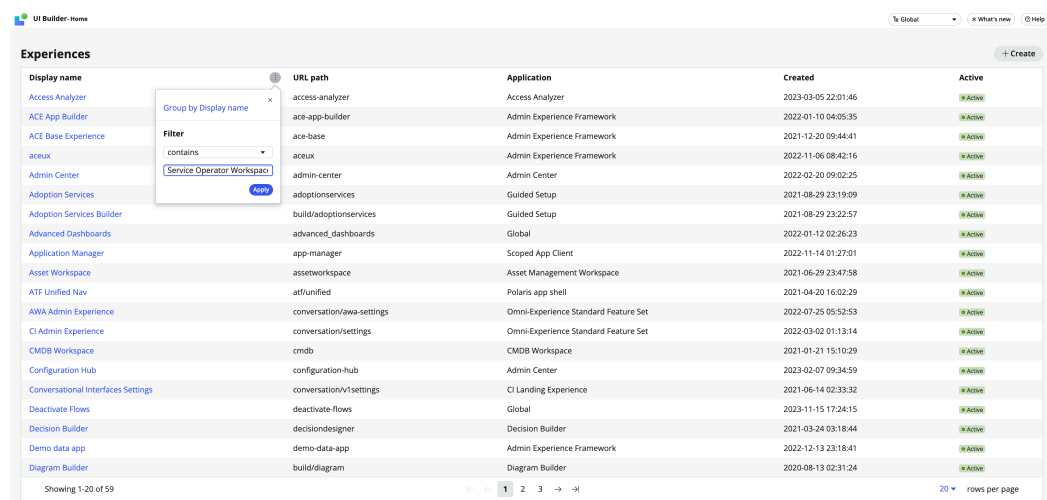

About this task

A page is content that lives at a specific URL. When a user opens the URL, they will see a different variant of this page based on the audience, conditions, and order that you set.

Procedure

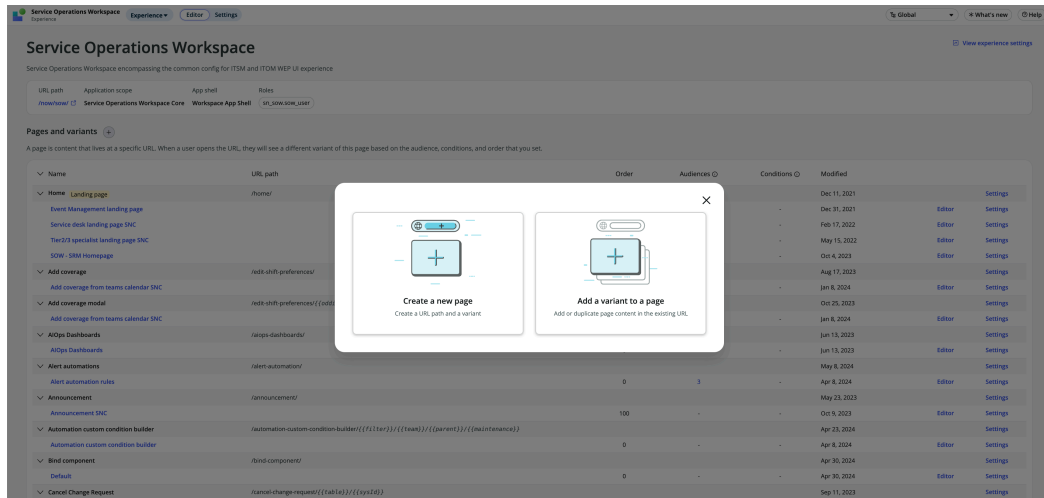

1. Navigate to All > Now Experience Framework > UI Builder.
2. From the Display name field, filter and search for Service Operations Workspace.

The Experiences page opens.

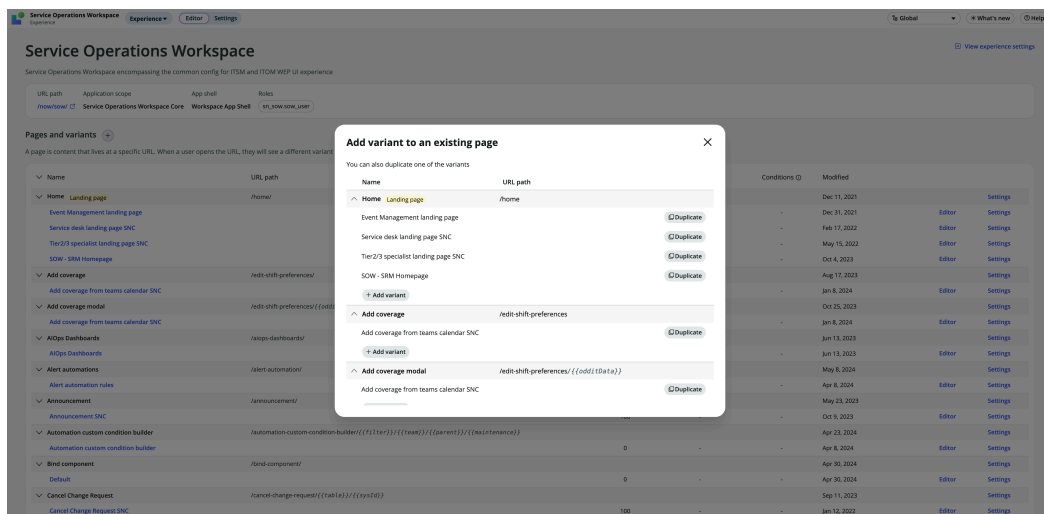

Display name	URL path	Application	Created	Active
Access Analyzer	access-analyzer	Access Analyzer	2023-03-05 22:01:46	Active

3. Open Service Operations Workspace by selecting it.
4. Next to Pages and variants, select the plus icon ().

5. Select Add a variant to a page.

The Add variant to an existing page window opens.

6. To create a duplicate page content in the existing URL path, select Duplicate and follow the steps.
