

Redirect to the Service Operations Workspace

home page

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Enable quick task prioritization by directing agents to the homepage immediately upon logging into the ServiceNow instance. This improves workflow efficiency by granting agents immediate access to essential tools and information, facilitating the timely resolution of critical tasks and issues.

Before you begin

Ensure that the value of the `glide.login.home` property is set to `/now/nav/ui/home`. This property specifies the default homepage that is displayed upon logging in.

Role required: `evt_mgmt_admin`

Procedure

1. Select All and then search for `sys_properties.list`.
2. Add the `sn_sow.service_desk_groups` property.
3. In the Value field, enter the `sys_id` of the user group to which the operator belongs.

Note:

If you want to specify multiple service desk groups, add a comma-separated list of group `sys_ids` in the value field.

4. Select Update.
