

View application service health information in Service Operations Workspace

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Monitor the health of services and filter the information that you want to view, allowing you to focus on the most relevant data and make informed decisions quickly.

Before you begin

Role required: evt_mgmt_user or evt_mgmt_admin

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the left navigation bar, select the Service Dashboard icon: .

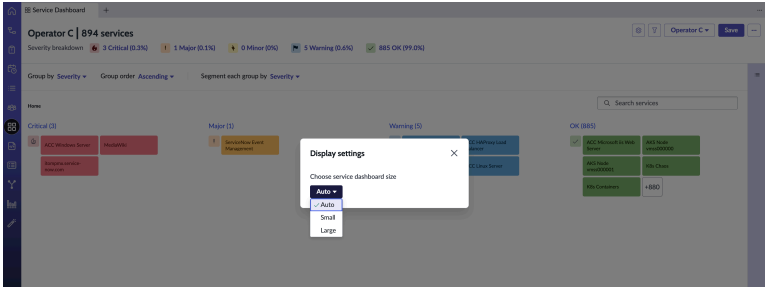

The Service Dashboard page appears.

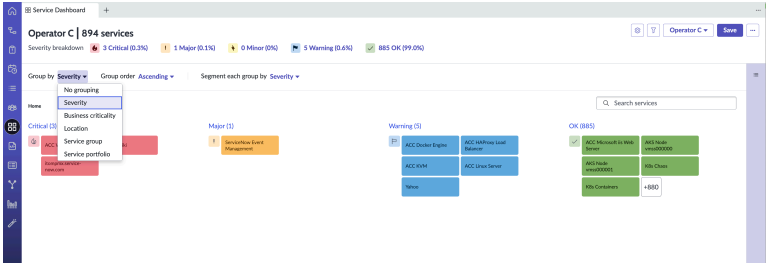

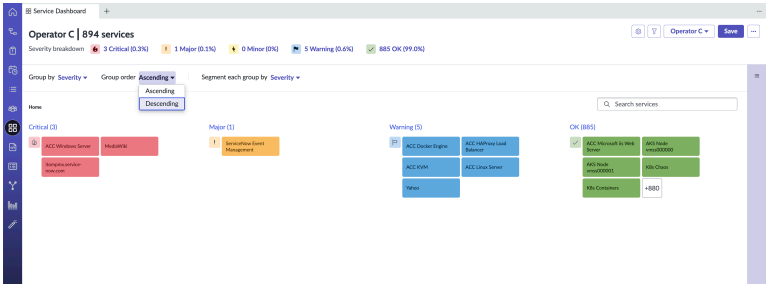

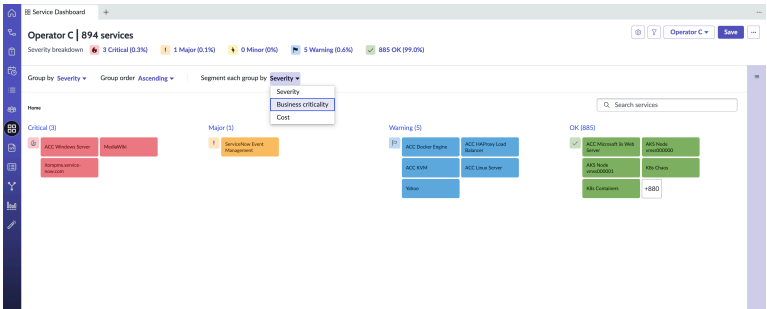

Note:

The application services that appear in the Service Dashboard are those added to the Impact Filter Services list. For more information, see Add application services for impact calculation.

3. Perform the following actions as required.

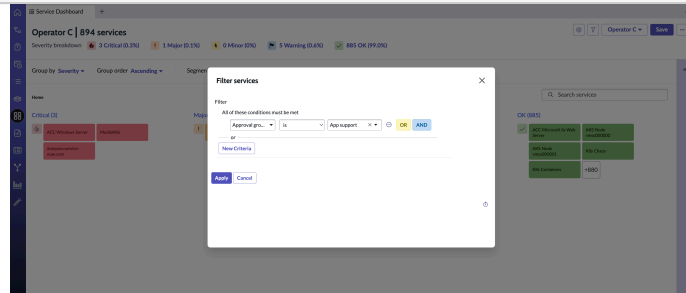

Table 1. Features and actions
