

View application service details in Service Operations Workspace

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

View comprehensive information about an application service, including its name, business criticality, ownership, process and operational status, traffic-based discovery details, discovery status, and relevant comments. This enables thorough analysis of the application service's current state and usage, provides clarity on ownership and criticality, and facilitates effective prioritization of resources and actions.

Before you begin

Role required: evt_mgmt_user, evt_mgmt_operator, or evt_mgmt_admin

About this task

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the left navigation bar, select the Service Dashboard icon: .

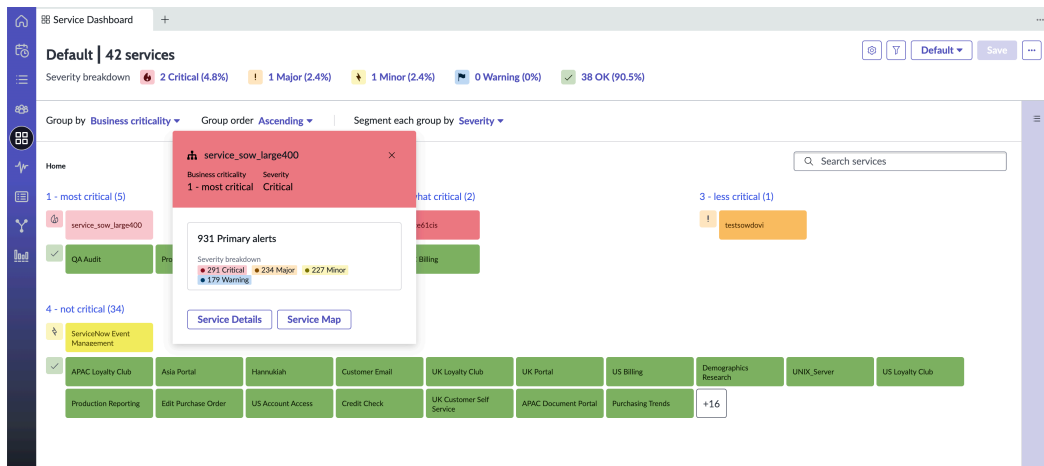

The Service Dashboard page appears.

Note:

The application services that appear in the Service Dashboard are those added to the Impact Filter Services list. For more information, see [Add application services for impact calculation](#).

3. Select a service tile.

A pop-up window displays the business criticality and severity of a service.

4. Select Service Details.

By default, the Details tab is selected.

The details page provides comprehensive information about an application service.
