

Add alert table to enable on-call scheduling for Service Operations Workspace for ITOM

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Enable on-call scheduling by incorporating the Alert table [em_alert] into the Trigger Rule Table Config list. This allows for creating shifts and implementing escalation triggers and policies, ensuring teams can promptly respond to alerts and maintain operational continuity.

Before you begin

Role required: evt_mgmt_admin

Procedure

1. Navigate to All and in the search field, type `trigger_rule_table_cfg.list`.
The Trigger Rule Table Configs page opens.
2. On the form, fill in the fields with the following values.

The screenshot shows the 'Trigger Rule Table Config' form with the following fields and values:

Field	Value
* Table	Alert [em_alert]
* Trigger group field	Assignment group
* Trigger user field	Assigned to
Application	Global
Journal field	Work notes

A 'Submit' button is located at the bottom left of the form.

- In the Table field, select Alert [em_alert].
 - In the Trigger group field, select Assignment group.
 - In the Trigger user field, select Assigned to.
 - In the Journal field, select Work notes.
3. Select Submit.

What to do next

Create on-call shift for your team.
