

Activate integration

- Release version: Australia
-
- Updated May 5, 2026
-
- ⌚ 1 minute to read

Activate integration allows you to enable a previously deactivated connector integration, restoring its functionality. This feature helps you seamlessly resume data flow and integration activities, ensuring continuity and efficient event management without the need to reconfigure the integration.

Before you begin

Ensure the integration is deactivated.

Role required: evt_mgmt_admin

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the bottom of the navigation pane, select the AIOps configuration center icon .
The ITOM AIOps configuration center page appears. The configuration center is a centralized workspace. Use it to configure and manage AIOps features from a single place.
3. On the ITOM AIOps configuration center page, under the Setup > Integrations section, select Manage Installed integrations.
4. Select the Installed integrations tab.
5. For the integration that you want to activate, select the Ellipses icon (**...**) and then select Activate.

Integrations launchpad

Bring together all of the events, metrics and logs from your infrastructure and get insights into the unified system.
