

Identify an assigned Express List view

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Identify Express List views assigned to you by your Event Management admin to make sure that you focus on specific services, priorities, or alerts.

Before you begin

Role required: evt_mgmt_operator, evt_mgmt_admin

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the navigation bar, select the Express list icon .
3. **Optional:** In the Filters pane, turn on the Use advanced filters option to access advanced filters assigned to you.
4. From the drop-down list in the Filters pane, select an Express List view assigned to you. The default view is marked as Default.

Note:

You can't override the filters in views assigned to you. However, you can modify, save, and share these views locally.

The Filters pane lists the predefined filters. The Express List table displays the columns configured for the selected view.
