

Place an alert in the Maintenance state

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Placing an alert into the Maintenance state indicates that there are issues with the alert's CIs that are being addressed.

Before you begin

Role required: evt_mgmt_admin or evt_mgmt_operator

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the navigation bar, select the Express list icon .
3. Filter with Active alerts.
4. Select an alert.

Overview	Details	Related records	Metrics	Playbook
