- ⌚ 1 minute to read

View extra information on the preview panel about impacted services that are bound to alerts.

Before you begin

Role required: evt_mgmt_operator, evt_mgmt_admin

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the navigation bar, select the Express list icon .
3. In the Active alerts list, select an alert check-box.
4. On the preview panel, open the Info tab.
5. Hover over the Impacted services section to display information icons.

6. Select the relevant icon to display extra information on an impacted service.

Table 1. Impacted service information icons

Icon	Name	Description
	Info	Displays the severity, the business criticality, and a short description of the impacted service. From this pop-up, you can open the service map in Service Operations

Icon	Name	Description
		Workspace by selecting View service map.  The service map shows the impacted path of alerts, enabling you to quickly assess their effect on the service. For more information, see View unified service map and the impact paths in Service Operations Workspace. If metrics data exists for this service, you can open the Metric Explorer from the pop-up by selecting View related metrics.
8	Contact person/group	Displays the name of the owner of the impacted service and the support group assigned to it.
