

View an alert analysis by Now Assist in Express List

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

View an alert analysis created by Now Assist using generative AI. Alert analyses include a human-readable brief of the alert and technical information to help you investigate the alert more effectively.

Before you begin

- Install the ITOM plugin in the Now Assist feature. For more information, see [Install Now Assist for IT Operations Management](#).
- View important information about the ServiceNow® Now Assist for IT Operations Management (ITOM) application in [Now Assist for ITOM](#).

Note:

Currently, Now Assist for ITOM only supports tag-based, CMDB, Log Analytics, Mixed, Automated, and Network Traffic-based alert groups. For all other alert group types, it only analyzes the parent alert.

Role required: evt_mgmt_operator

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the navigation bar, select the Express list icon .
3. In the Active alerts list, select the information icon (ⓘ) next to the alert.
4. On the preview panel Info tab, select Analyze in Alert analysis by Now Assist.
5. View the information provided in the Alert analysis.
6. **Optional:** Use the Alert analysis icons to perform related tasks.

Table 1. Alert analysis icons

Icon	Description
	Copy the content of the alert analysis to the clipboard.
	Refresh the alert analysis.

Icon	Description
	Note: Refreshing regenerates the results. Past results are deleted.
