-
- ⌚ 1 minute to read

Remove secondary alerts from an alert group directly from the Express List pane or from the preview panel.

Before you begin

Role required: evt_mgmt_operator, evt_mgmt_admin

Note:

The evt_mgmt_user role is view-only and does not have permission to perform this action.

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the navigation bar, select the Express list icon .
3. Remove a secondary alert from an alert group.

You can remove alerts from a group regardless of whether you are working in the main pane or in the preview panel. The preview panel opens only when a single alert or alert group is selected.

Location	Action
The Express List pane	a. In the Active alerts list, select the chevron icon (>) at the beginning of one or more alert group rows to display the alerts contained in the group. b. Select one or more secondary alerts. c. From the Close drop-down list at the top right of the list, select Remove from group. Note: When you are trying to remove the only secondary alert from an alert group, thereby ungrouping the group, a message displays that enables you to undo the action.

Location	Action
The Express List preview panel for a group of alerts	a. In the Alerts in group tab, select an alert tile. b. Select the more actions icon (). c. Select Remove from group.
