-
- ⌚ 1 minute to read

Create different views of categorized alerts in Express List by either displaying or filtering out alerts that match a selected alert.

Before you begin

Role required: evt_mgmt_operator, evt_mgmt_admin

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. In the primary navigation, select the Express List icon ().
3. Right-click an alert row.
4. Match or filter out matching alerts.
 - Display matching alerts by selecting Show Matching from the context menu.
 - Filter out matching alerts by selecting Filter Out from the context menu.
