

Save a custom filter in Express List

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

Save your custom view of categorized alerts in Express List to use again, share, or set as your default view. Saving your custom view saves all filters, tags, and conditions.

Before you begin

Role required: evt_mgmt_operator, evt_mgmt_admin

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. In the primary navigation, select the Express List icon (.
3. Once you have set up a filter that you want to reuse, set as your default view, or share with others, save the filter.

For more information about filtering the Express List alert display, see the following topics:

- Filter the Express List display using attributes
