View the Dependency View map for an alert from the alert record page.

Before you begin

Role required: evt_mgmt_operator, evt_mgmt_admin

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the navigation bar, select the Express list icon .
3. In the alert list, select the number of the alert for which you want to view the dependency view.
The alert record opens. The Overview tab is selected by default.
4. From the Utilities panel, select Dependency View.

The screenshot shows the alert record page for Alert0137257. The top navigation bar includes 'Express List', 'Alert0137216', and 'Alert0137257'. The main header displays 'Group of alerts, Certificate is about to e...' with buttons for 'Close', 'Launch playbook', 'Save', and a menu icon. Below the header, the alert details are shown: Priority group (Low), Severity (Critical), State (Open), Initial event generation time (2025-11-25 07:18:56), and Group (CMDB). The 'Overview' tab is selected, showing a 'Summary' section with an 'Identified issue' box. The issue description is 'Group of alerts, Check Memory WARNING: The total memory utilization is: 89%' with a link to 'View topology map'. Below this, a table lists 'Alerts in group 3'.

Number	Description	State	Initial
Alert0137254	There is an error in the MID server - Crucil	Open	2025-11-25 07:18:56
Alert0137256	There is an error in the MID server - Crucil	Open	2025-11-25 07:18:56

The 'Utilities' panel on the right contains three options: 'Launch App CMDB Group Visualisation', 'Launch App Search Google', and 'Launch App Dependency View'.

The Dependency View map opens.
