

Delete an automation

- Release version: Australia
-
- Updated March 12, 2026
-
- ⌚ 1 minute to read

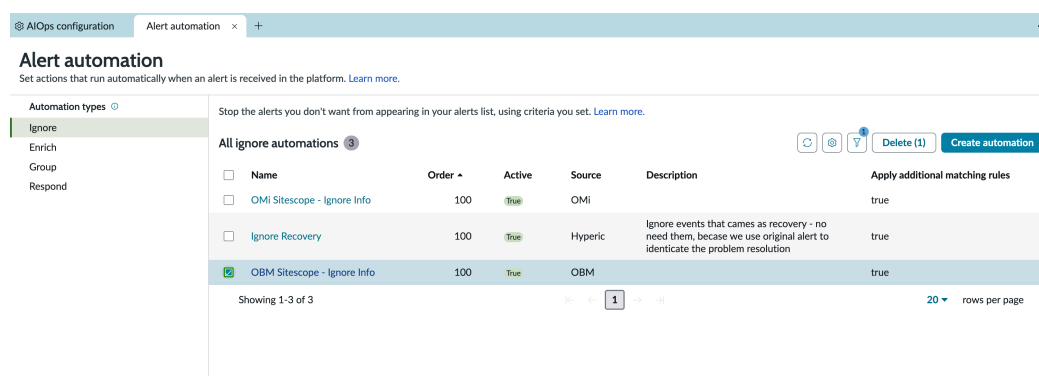

Delete an automation to permanently remove an automated alert handling rule from your system.

Before you begin

Role required: evt_mgmt_admin, evt_team_operator, or srm_responder

Procedure

1. Navigate to Workspaces > Service Operations Workspace.
2. From the bottom of the navigation pane, select the AIOps configuration center icon . The ITOM AIOps configuration center page appears. The configuration center is a centralized workspace. Use it to configure and manage AIOps features from a single place.
3. On the ITOM AIOps configuration center page, under the Optimize section, select the automation type that you want to delete, such as Ignore, Enrich, Group, or Respond. The page for that automation type opens, displaying all the existing automations.
4. To delete an automation, select the check box next to its name and then select Delete.

The screenshot shows the 'Alert automation' page in the AIOps configuration center. The page has a sidebar with 'Automation types' (Ignore, Enrich, Group, Respond) and a main content area. The main content area has a header 'Alert automation' and a sub-header 'Set actions that run automatically when an alert is received in the platform. Learn more.' Below this is a section 'All ignore automations' with a table of automations. The table has columns: Name, Order, Active, Source, and Description. The table lists three automations: 'OMI Sitescope - Ignore Info', 'Ignore Recovery', and 'OBM Sitescope - Ignore Info'. The 'OBM Sitescope - Ignore Info' row is selected, and a 'Delete (1)' button is visible. The page also shows 'Showing 1-3 of 3' and '20 rows per page'.

Name	Order	Active	Source	Description
OMI Sitescope - Ignore Info	100	True	OMI	
Ignore Recovery	100	True	Hyperic	Ignore events that comes as recovery - no need them, because we use original alert to identicate the problem resolution
OBM Sitescope - Ignore Info	100	True	OBM	

5. In the confirmation window, select Delete. The alert is permanently deleted.
