- ⌚ 1 minute to read

Define how metrics are displayed within Service Operations Workspace.

Table 1. Metrics View Configuration form

Field	Description
Title	Name of the metric.
Active	Option to activate the metric.
Order	Numerical value indicating the order of the metric on the page.
Configuration Item Type	Configuration item type. Available options are: • cmdb_ci_app_server_tomcat • cmdb_ci_metric_extension • cmdb_ci_app_win_server
Source Metrics Types	Metric types you want the metric to monitor. Select the Lock icon () to unlock the list of source metric types and select metric types to be monitored.
Chart Type	Type of chart in which the metric is presented in Service Operations Workspace, either Line or Stacked Bar.

To return to the procedure, see Configure alert metrics.
